**QUESTION 1**

You have a Microsoft 365 subscription.

All users have their email stored in Microsoft Exchange Online.

In the mailbox of a user named User1, you need to preserve a copy of all the email messages that contain the word ProjectX.

What should you do first?

A. From the Security and Compliance admin center, create a data loss prevention (DLP) policy.

B. From the Security and Compliance admin center, create a label and label policy.

C. From the Security and Compliance admin center, create, create a label and a label policy.

D. From the Security and Compliance admin center, start a message trace.

E. From the Exchange admin center, start a mail flow message trace

Correct Answer: A

A DLP policy contains a few basic things:

Where to protect the content: locations such as Exchange Online, SharePoint Online, and OneDrive for Business sites, as well as Microsoft Teams chat and channel messages.

When and how to protect the content by enforcing rules comprised of:

Conditions the content must match before the rule is enforced. For example, a rule might be configured to look only for content containing Social Security numbers that\\'s been shared with people outside your organization.

Actions that you want the rule to take automatically when content matching the conditions is found. For example, a rule might be configured to block access to a document and send both the user and compliance officer an email notification.

**QUESTION 2**

On which server should you use the Defender for identity sensor?

A. Server1

B. Server2

C. Server3

D. Server4

E. Servers5

Correct Answer: A

However, if the case study had required that the DCs can\\'t have any s/w installed, then the answer would have been a standalone sensor on Server2. In this scenario, the given answer is correct. BTW, ATP now known as Defender for Identity.

**QUESTION 3**

You need to configure a conditional access policy to meet the compliance requirements.

You add Exchange Online as a cloud app.

Which two additional settings should you configure in Policy1? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Correct Answer:

## New

**QUESTION 4**

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. You create an Azure Advanced Threat Protection (ATP) workspace named Workspace1. The tenant contains the users shown in the following table.

| Name | Member of group | Azure AD role |
|------|-----------------|---------------|
| User1 | Azure ATP Workspace1 Administrators | None |
| User2 | Azure ATP Workspace1 Users | None |
| User3 | None | Security administrator |
| User4 | Azure ATP Workspace1 Users | Global administrator |

You need to modify the configuration of the Azure ATP sensors.

Solution: You instruct User3 to modify the Azure ATP sensor configuration.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Only Azure ATP administrators can modify the sensors.

Any global administrator or security administrator on the tenant\\'s Azure Active Directory is automatically an Azure ATP administrator.

**QUESTION 5**

You need to grant a user a named User1 access to download compliance reports from the Security and Compliance reports from the Security from the Security and Compliance admin center. The solution must use the principle of least privilege. What should you do?

A. Add User1 to the Security Reader role group

B. Create a new role group that has the Preview role and add User1 to the role group.

C. Add user1 to the Compliance Administrator role group.

D. Add User1 to the Service Assurance User role group.

Correct Answer: A

**QUESTION 6**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory domain. The domain contains 2,000 computers that run Windows 8.1 and have applications installed as shown in the following table.

| Name | Application count | Used by |
|------|------------------|---------|
| App1 | 20 | Finance department, sales department |
| App2 | 100 | Marketing department |

You enroll all the computers in Upgrade Readiness.

You need to ensure that App1 and App2 have an UpgradeDecision status of Ready to upgrade.

Solution: You set the Importance status of App1 to Business critical.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Business Critical will prevent the app having a status of Ready to upgrade.

References: https://docs.microsoft.com/en-us/windows/deployment/upgrade/upgrade-readiness-identify-apps

**QUESTION 7**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are deploying Microsoft Intune.

You successfully enroll Windows 10 devices in Intune.

When you try to enroll an iOS device in Intune, you get an error.

You need to ensure that you can enroll the iOS device in Intune.

Solution: You create an Apple Configurator enrollment profile.

Does this meet the goal?

A. Yes

B. No

Correct Answer: A

**QUESTION 8**

You have a Microsoft 365 tenant that contains devices registered for mobile device management. The devices are configured as shown in the following table.

| Name | Platform |
|------|----------|
| Device1 | MacOS |
| Device2 | Windows 10 Pro for Workstations |
| Device3 | Windows 10 Enterprise |
| Device4 | iOS |
| Device5 | Android |

You plan to enable VPN access for the devices.

What is the minimum number of configuration policies required?

A. 3

B. 5

C. 4

D. 1

Correct Answer: D

**QUESTION 9**

You need to ensure that the support technicians can meet the technical requirement for the Montreal office mobile devices. What is the minimum of dedicated support technicians required?

A. 1

B. 4

C. 7

D. 31

Correct Answer: B

References: https://docs.microsoft.com/en-us/sccm/mdm/deploy-use/enroll-devices-with-device-enrollment-manager

**QUESTION 10**

You need to consider the underlined segment to establish whether it is accurate.

Your company has an Active Directory domain that includes 100 Windows 8.1 devices.

To deploy a custom Windows 10 Enterprise image to the Windows 8.1 devices, you should configure a provisioning

package.

Select "No adjustment required" if the underlined segment is accurate. If the underlined segment is inaccurate, select the accurate option.

A. No adjustment required.

B. perform an in-place upgrade

C. perform a subscription activation

D. make use of Windows Autopilot

Correct Answer: B

References: https://docs.microsoft.com/en-us/microsoft-365/enterprise/windows10-infrastructure

**QUESTION 11**

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

**Answer Area**

| Statements | Yes | No |
|---|---|---|
| An audit log search from the Security & Compliance admin center will provide the answer to question 1. | ○ | ○ |
| An audit log search from the Security & Compliance admin center will provide the answer to question 2. | ○ | ○ |
| An audit log search from the Security & Compliance admin center will provide the answer to question 3. | ○ | ○ |

Correct Answer:

**Answer Area**

| Statements | Yes | No |
|---|---|---|
| An audit log search from the Security & Compliance admin center will provide the answer to question 1. | ○ | ○ |
| An audit log search from the Security & Compliance admin center will provide the answer to question 2. | ○ | ○ |
| An audit log search from the Security & Compliance admin center will provide the answer to question 3. | ○ | ○ |

**QUESTION 12**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You need to prevent users from accessing your Microsoft SharePoint Online sites unless the users are connected to your on-premises network.

Solution: From the Azure Active Directory admin center, you create a trusted location and a conditional access policy.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

This solution applies to users accessing Azure Active Directory, not to users accessing SharePoint Online. Conditional Access in SharePoint Online can be configured to use an IP Address white list to allow access.

References: https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition https://techcommunity.microsoft.com/t5/Microsoft-SharePoint-Blog/Conditional-Access-in-SharePoint- Online-and-OneDrive-for/ba-p/46678

**QUESTION 13**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

You manage Windows 10 devices by using Microsoft System Center Configuration Manager (Current Branch).

You configure pilot co-management.

You add a new device named Device1 to the domain. You install the Configuration Manager client on Device1.

You need to ensure that you can manage Device1 by using Microsoft Intune and Configuration Manager.

Solution: You add Device1 to a Configuration Manager device collection.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B
