QUESTION 1

An administrator plans to deploy several Azure Advanced Threat Protection (ATP) sensors.

You need to provide the administrator with the Azure information required to deploy the sensors.

What information should you provide?

- A. an Azure Active Directory Authentication Library (ADAL) token
- B. the public key
- C. the access key
- D. the URL of the Azure ATP admin center

Correct Answer: D

Reference: <https://docs.microsoft.com/en-us/azure-advanced-threat-protection/workspace-portal>

QUESTION 2

You have an Azure Sentinel workspace that has an Azure Active Directory (Azure AD) connector and a Microsoft Office 365 connector. You need to assign built-in role-based access control (RBAC) roles to achieve the following tasks:

1.
Create and run playbooks.

2.
Manage incidents.

The solution must use the principle of least privilege.

Which two roles should you assign? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Automation Operator
- B. Azure Sentinel responder
- C. Automation Runbook Operator
- D. Azure Sentinel contributor
- E. Logic App contributor

Correct Answer: DE

Reference: <https://docs.microsoft.com/en-us/azure/sentinel/roles>

QUESTION 3

Your company uses Microsoft Azure Advanced Threat Protection (ATP).

You enable the delayed deployment of updates for an Azure ATP sensor named Sensor1.

How long after the Azure ATP cloud service is updated will Sensor1 be updated?

- A. 7 days
- B. 24 hours
- C. 1 hour
- D. 48 hours
- E. 12 hours

Correct Answer: B

Note: The delay period was 24 hours. In ATP release 2.62, the 24 hour delay period has been increased to 72 hours.

QUESTION 4

A user phones to complain that his browser is not allowing him to visit a URL that is normally used for business saying that "This website was blocked by your Office 365 administrator." as in the exhibit.

Opening this website might not be safe.

`www.unsafe_url/login.php`

You can't access this website because it might not be safe. If you want to know why it was blocked, contact your administrator.

X Close this page

Continue anyway (not recommended)

You know that your M365 security policies was recently updated. Where would you start your investigation?

- A. Microsoft Defender ATP
- B. Azure ATP
- C. Office ATP
- D. Microsoft Secure Score

Correct Answer: C

URL blocking is part of Office365 ATP Safe Links Reference: <https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/atp-safe-links-warning-pages>

QUESTION 5

How do you integrate Office365 ATP with MD-ATP? Each option is a complete solution. (Choose two.)

- A. There is no integration between Office365 ATP and MD-ATP
- B. Go to protection.office.com, threat management, explorer, WDATP settings, enable
- C. Go to securitycenter.windows.com, settings, advanced features, Office 365 threat intelligence connection, enable

D. Go to security.microsoft.com, threat management, explorer, WDATP settings, enable

Correct Answer: BC

Office365 ATP is referred to as Office365 threat intelligence in the integration settings. You can enable the integration between the two products from either side. You don't have to configure the integration on both sides. This is true for

Office365 ATP and MD-ATP, but not for all three ATP products.

Be sure to understand which ATP products can be integrated with each other and when you would need to do so.

office-365-ti

QUESTION 6

You need to identify which Microsoft platforms provide hybrid capabilities for migrating from an on-premises deployment. Which two platforms provide hybrid capabilities for migration? Each correct answer provides a complete solution. (Choose two.) NOTE: Each correct selection is worth one point.

- A. Microsoft Skype for Business
- B. Microsoft Yammer
- C. Microsoft Exchange
- D. Microsoft Teams

Correct Answer: AC

Reference: <https://docs.microsoft.com/en-us/office365/enterprise/architecture-of-microsoft-hybrid-cloud-scenarios>

QUESTION 7

Which of the following tools will you use to manage regulatory compliance within the shared responsibility model of the cloud?

- A. Service Trust Portal
- B. Compliance Manager
- C. Trust Center
- D. Azure Security Center
- E. Microsoft Compliance Portal

Correct Answer: B

Both the compliance manager and the trust center are components of the service trust portal. Each of them have a different purpose. See the document link for details.

Reference: <https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-with-service-trust-portal#compliance>

QUESTION 8

You need to ensure that all links to malware.contoso.com within documents stored in Microsoft Office 365 are blocked when the documents are accessed from Office 365 ProPlus applications.

To complete this task, sign in to the Microsoft 365 admin center.

Correct Answer: See below.

1.
After signing in to the Microsoft 365 admin center, navigate to Threat management, choose Policy > Safe Links.
2.
In the Policies that apply to the entire organization section, select Default, and then choose Edit (the Edit button resembles a pencil).
3.
In the Block the following URLs section, add the malware.contoso.com link.
4.
In the Settings that apply to content except email section, select all the options.
5.
Choose Save.

Reference: <https://docs.microsoft.com/en-us/microsoft-365/security/office-365-security/set-up-atp-safe-links-policies?view=o365-worldwide>

QUESTION 9

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

To increase the GDPR Compliance Score for Microsoft Office 365, you must [answer choice].

assign action items	v
review actions	
perform an assessment	
create a service request with Microsoft	

The current GDPR Compliance Score [answer choice].

proves that the organization is non-compliant	v
proves that the organization is compliant	
shows that actions are required to evaluate compliance	

Correct Answer:

Answer Area

To increase the GDPR Compliance Score for Microsoft Office 365, you must [answer choice].

assign action items	v
review actions	
perform an assessment	
create a service request with Microsoft	

The current GDPR Compliance Score [answer choice].

proves that the organization is non-compliant	v
proves that the organization is compliant	
shows that actions are required to evaluate compliance	

QUESTION 10

HOTSPOT

You have a Microsoft 365 subscription that contains the users shown in the following table.

Name	Role
User1	Global administrator
User2	Privileged Role Administrator
User3	Security administrator

You implement Azure Active Directory (Azure AD) Privileged Identity Management (PIM).

From PIM, you review the Application Administrator role and discover the users shown in the following table.

Name	Assignment type
UserA	Permanent
UserB	Eligible
UserC	Eligible

The Application Administrator role is configured to use the following settings in PIM:

1.
Maximum activation duration: 1 hour
2.
Notifications: Disable
3.
Incident/Request ticket: Disable
4.
Multi-Factor Authentication: Disable
5.
Require approval: Enable
6.
Selected approver: No results

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
If UserB requests the Application Administrator role, User1 can approve the request of UserB.	<input type="radio"/>	<input type="radio"/>
If UserB requests the Application Administrator role, User2 can approve the request of UserB.	<input type="radio"/>	<input type="radio"/>
If UserC requests the Application Administrator role, User3 can approve the request of UserC.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Statements	Yes	No
If UserB requests the Application Administrator role, User1 can approve the request of UserB.	<input checked="" type="radio"/>	<input type="radio"/>
If UserB requests the Application Administrator role, User2 can approve the request of UserB.	<input checked="" type="radio"/>	<input type="radio"/>
If UserC requests the Application Administrator role, User3 can approve the request of UserC.	<input type="radio"/>	<input checked="" type="radio"/>

QUESTION 11

You have a hybrid Microsoft 365 deployment that contains the Windows 10 devices shown in the following table. You assign a Microsoft Endpoint Manager disk encryption policy that automatically and silently enables BitLocker Drive Encryption (BitLocker) on all the devices. Which devices will have BitLocker enabled?

- A. Device1, Device2, and Device3
- B. Device2 only
- C. Device1 and Device2 only
- D. Device2 and Device3 only

Correct Answer: B

To silently enable BitLocker, the device must be Azure AD Joined or Hybrid Azure AD Joined and the device must contain TPM (Trusted Platform Module) 2.0. Incorrect Answers:

A: Device1 is not Azure AD Joined or Hybrid Azure AD Joined, and the TPM version on Device3 is only 1.3. To silently enable BitLocker, the device must be Azure AD Joined or Hybrid Azure AD Joined and the device must contain TPM

(Trusted Platform Module) 2.0.

C: Device1 is not Azure AD Joined or Hybrid Azure AD Joined. To silently enable BitLocker, the device must be Azure AD Joined or Hybrid Azure AD Joined.

D: The TPM version on Device3 is only 1.3. To silently enable BitLocker, the device must contain TPM (Trusted Platform Module) 2.0.

Reference:

<https://docs.microsoft.com/en-us/mem/intune/protect/encrypt-devices>

QUESTION 12

You have implemented Azure AD Connect for your organization. You have made some changes to user accounts in your local Active Directory and notice that these changes have not yet synchronized to Azure. What is the PS command to force an Azure AD Connect sync?

- A. Start-ADSyncSyncCycle-PolicyType Delta
- B. Start-ADSyncSyncCycle-PolicyType Initial
- C. Get-ADSyncScheduler
- D. Set-MSOLDirSyncFeature-Feature SynchronizeUpnForManagedUsers-Enable \$true

Correct Answer: A

Reference: <https://techcommunity.microsoft.com/t5/itops-talk-blog/powershell-basics-how-to-force-azuread-connect-to-sync/ba-p/887043> <https://docs.microsoft.com/en-us/azure/active-directory/hybrid/how-to-connect-sync-what-is>

<https://docs.microsoft.com/en-us/azure/activedirectory/hybrid/how-to-connect-syncservice-features>

QUESTION 13

NOTE: This question is a part of a series of questions that present the same scenario. For each of the following statements, select the best response(s) to the question or statement below. Each answer is worth one point. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. Your company's head of IT Security has instructed you to put a continual privileged access review system in place. He requires that all privileged accounts be reviewed every seven days. Users with administrative privileges must self-assess their access, however, if an administrator doesn't respond within three days of receiving such a request, privileged access must be removed. Where would you configure what happens if a reviewer doesn't respond to the request?

- A. Upon completion settings
- B. Advanced settings
- C. Duration
- D. Review role membership

Correct Answer: A

Upon completion settings allows you to specify what happens when a user doesn't respond to the assessment.
