QUESTION 1

SIMULATION

You are a functional consultant for Contoso Entertainment System USA (USMF).

USMF plans to categorize a new night shift in its factory.

You need to create a new cost category named NightShift for the night shift.

To complete this task, sign in to Dynamics 365 portal.

Correct Answer:

1.

Go to Organization Administration > Categories > Shared Categories.

2.

Click New to create a new shared category.

3.

Give the shared category an ID and a name (NightShift).

4.

Select the Can be used in Production checkbox and close the window.

5.

Back in Organization Administration > Categories, click on Categories.

6.

Click New to create a new category.

7.

Select the Category ID from the shared category.

8.

The category will inherit the ID and name (Nightshift) from the shared category.

9.

Click Close to close the window.

QUESTION 2

A company that uses Lean manufacturing concepts to produce paper plates has redesigned the layout of the

warehouse and production floor.

The company's production flow activities no longer match the tasks of the workers. Employees use paper and manual communication to complete the tasks.

You need to update the production flows to match their current processes by deactivating the obsolete production flows and creating new ones.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Deactivate production flow version
- Create a new production flow version
- Close all active Kanbans
- Create and relate activities for a production flow version
- Activate production flow version
- Define product quantities and Kanban quantities
- Create Kanban rules
- Configure events

Answer Area

Correct Answer:

Actions

Close all active Kanbans
Define product quantities and Kanban quantities
Configure events

Answer Area

Deactivate production flow version
Create a new production flow version
Create and relate activities for a production flow version
Create Kanban rules
Activate production flow version

QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solutions, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing plant uses Lean process. You plan to outsource a painting operation to a subcontracting vendor. You create a service item named SP-01 to represent the painting service.

You need to create a subcontracting activity for the painting service.

Solution: 1.) Create a purchase agreement for the subcontracting vendor and add SP-01 as the painting service 2.) Create a vendor resource then create a work cell for outsourced painting and add the resource to the work cell 3.) Create a production flow process activity for the painting work cell and add the component to be painted as a picking activity 4.) Create a service term to tie the purchase agreement to the activity

Does this solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 4

A customer produces light projection toys for holiday decorations throughout the year. Vendors have negotiated rebate agreements as a condition of their contract. The contract also contains the visual templates required for the customer to use in a season.

Vendor rebate agreements must only be applied if the following requirements are met:

1.

Units of measure for deliverables are the same unit of measure as on the agreement.

2.

The agreement is valid as of the date a purchase order is generated. You need to configure the vendor rebate agreements. What should you do?

- A. Set the Calculation date type field value to Created.
- B. Set the Cumulative purchase by field value to the end of the season date.
- C. Set the Calculation date type field value to Requested delivery.
- D. Set the Cumulative purchase by field value to the beginning of the season date.

Correct Answer: A

QUESTION 5

A paint manufacturer is using Process manufacturing. The manufacturer has a quality error. Batches of paint that use the wrong formula have been marked for rework.

The production planner reports they cannot schedule the batch order even though the order has been estimated.

You need to add reservations to the items to be used for the rework order.

What should you do?

- A. Reserve the inventory in the formula
- B. Reset the batch order and delete the formula items. Re-enter the formula items
- C. Add by-products that need to be used and then re-estimate
- D. Add co-products that need to be used and then re-estimate

Correct Answer: A

QUESTION 6

A company sells large batches of chemicals. Item specifications vary from batch to batch.

You must fulfill multiple orders from the same batch of chemicals. If a single batch cannot be reserved, manual reservation must be used. The system must also make reservations based on the earliest batch receipt date.

You need to set up a new chemical item that automatically uses the new batch reservation logic.

Which three settings should you configure? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. In the Tracking dimension group, select Coverage plan by dimension for batch number.
- B. In the Item model group, select FEFO date-controlled.
- C. In the Item model group, select the FIFO inventory model.
- D. In the Item model group, select Same batch reservation and Consolidate requirements.
- E. In the Storage dimension group, select Coverage plan by dimension for the site and warehouse dimensions.

Correct Answer: ACD

QUESTION 7

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solutions,

while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing plant uses Lean process. You plan to outsource a painting operation to a subcontracting vendor. You create a service item named SP-01 to represent the painting service.

You need to create a subcontracting activity for the painting service.

Solution:

- 1.) Create a vendor warehouse for the subcontracting vendor
 - 2.) Create a vendor resource and add it to a new work cell for outsource painting
 - 3.) Create a production flow transfer activity and specify the vendor warehouse as the target warehouse
- Does this solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 8

You need to configure system attributes.

Which attribute types should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

QUESTION 9

A company produces various products using Process manufacturing.

The manufacturer makes two co-products from a formula and rarely produces the primary formula item. The costs of making the co-products are inflated. The manufacturer must update the costs of producing the co-products and change the

formula to not produce the primary formula item.

You need to change the primary formula item type.

What should you do?

- A. Associate the costs to produce by-products with the items
- B. Change the primary formula item to use the planning item type
- C. Change the cost of the primary formula item to zero and then recalculate the item cost
- D. Change the production type to Bill of materials and recalculate the item cost

Correct Answer: B

QUESTION 10

A customer produces light projection toys for holiday decorations throughout the year.

You are in the first month of a season. Production flows take one day to complete.

The floor supervisor reports that seasonal production targets will not be met. You review the Kanban schedule board and identify thousands of unplanned jobs.

You need to plan the jobs to be completed two weeks prior to the start of the next season.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Set the Automatic planning option for each unscheduled job to Yes.
- B. Manually schedule each unscheduled job on its due date.
- C. Set the Automatic planning option for each unscheduled job to No.
- D. Manually schedule each unscheduled job forward from the date of the end of the season.
- E. Manually schedule each unscheduled job to the next period of the start of the next season.

Correct Answer: BD

Reference: <https://docs.microsoft.com/en-us/dynamics365/supply-chain/production-control/leanmanufacturing-kanban-job-scheduling>

QUESTION 11

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses Dynamics 365 Supply Chain Management to manage production configuration.

A product designer creates a remote control toy that can be purchased with different tire sizes.

Sales representatives need to perform product configuration for the custom tire variants when they create a new order.

Solution: Select the custom tire size when filling out each sales order line.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: A

QUESTION 12

A company uses Dynamics 365 Process manufacturing.

Employees work a half day so that they can attend a company event. You have a rush order that must be completed that same day.

After reviewing the net requirements of the batch order, only 400 of the total quantity of 1400 units must be completed today. The production manager must retain the original batch number as the quantity of 400. The original batch number

must appear on documentation for the customer.

You need to split the batch order into two orders.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Select Split.	
Select Rework.	
Enter 400 in the split quantity field.	
Enter 1,000 in the split quantity field.	
Create a new production order for a quantity of 400.	
Select the batch order.	

Correct Answer:

	Select the batch order.
Select Rework.	Select Split.
Enter 400 in the split quantity field.	Enter 1,000 in the split quantity field.
Create a new production order for a quantity of 400.	

QUESTION 13

You need to set up the configuration model to price the motorcycles correctly. What should you do?

- A. Set Order type in price model to Sales Order and Pricing method in Version to Attribute based
- B. Set Order type in price model to Sales Order and Pricing method in Version to Cost based.
- C. Set Order type in price model to Sales Quotation and Pricing method in Version to Attribute based.
- D. Set Order type in price model to Sales Quotation and Pricing method in Version to Cost based

Correct Answer: D
