QUESTION 1

You have an Azure Active Directory (Azure AD) tenant.

You open the risk detections report.

Which risk detection type is classified as a user risk?

- A. password spray
- B. anonymous IP address
- C. malicious IP address
- D. leaked credentials

Correct Answer: D

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/concept-identity-protection-risks>

QUESTION 2

You have a Microsoft 365 tenant.

All users have mobile phones and Windows 10 laptops.

The users frequently work from remote locations that do not have Wi-Fi access or mobile phone connectivity. While working from the remote locations, the users connect their laptops to a wired network that has internet access.

You plan to implement multi-factor authentication (MFA).

Which MFA authentication method can the users use from the remote location?

- A. voice
- B. Windows Hello for Business
- C. email
- D. security questions

Correct Answer: B

QUESTION 3

You have an Azure Active Directory (Azure AD) tenant that contains a user named User1 and the conditional access policies shown in the following table.

Name	Status	Conditional access requirement
CAPolicy1	On	Users connect from a trusted IP address.
CAPolicy2	On	Users' devices are marked as compliant.
CAPolicy3	Report-only	The sign-in risk of users is low.

You need to evaluate which policies will be applied to User1 when User1 attempts to sign-in from various IP addresses. Which feature should you use?

- A. Access reviews
- B. Identity Secure Score
- C. The What If tool
- D. the Microsoft 365 network connectivity test tool

Correct Answer: C

QUESTION 4

You have an Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2
User3	Group3

The tenant has the authentication methods shown in the following table.

Method	Target	Enabled
FIDO2	Group2	Yes
Microsoft Authenticator app	Group1	Yes
SMS	Group3	Yes

Which users will sign in to cloud apps by matching a number shown in the app with a number shown on their phone?

- A. User1 only
- B. User2 only
- C. User3 only

D. User1 and User2 only

E. User2 and User3 only

Correct Answer: A

QUESTION 5

You have a Microsoft 365 tenant.

The Sign-ins activity report shows that an external contractor signed in to the Exchange admin center.

You need to review access to the Exchange admin center at the end of each month and block sign-ins if required.

What should you create?

A. an access package that targets users outside your directory

B. an access package that targets users in your directory

C. a group-based access review that targets guest users

D. an application-based access review that targets guest users

Correct Answer: C

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/governance/access-reviews-overview>

QUESTION 6

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Active Directory forest that syncs to an Azure Active Directory (Azure AD) tenant.

You discover that when a user account is disabled in Active Directory, the disabled user can still authenticate to Azure AD for up to 30 minutes.

You need to ensure that when a user account is disabled in Active Directory, the user account is immediately prevented from authenticating to Azure AD.

Solution: You configure Azure AD Password Protection.

Does this meet the goal?

A. Yes

B. No

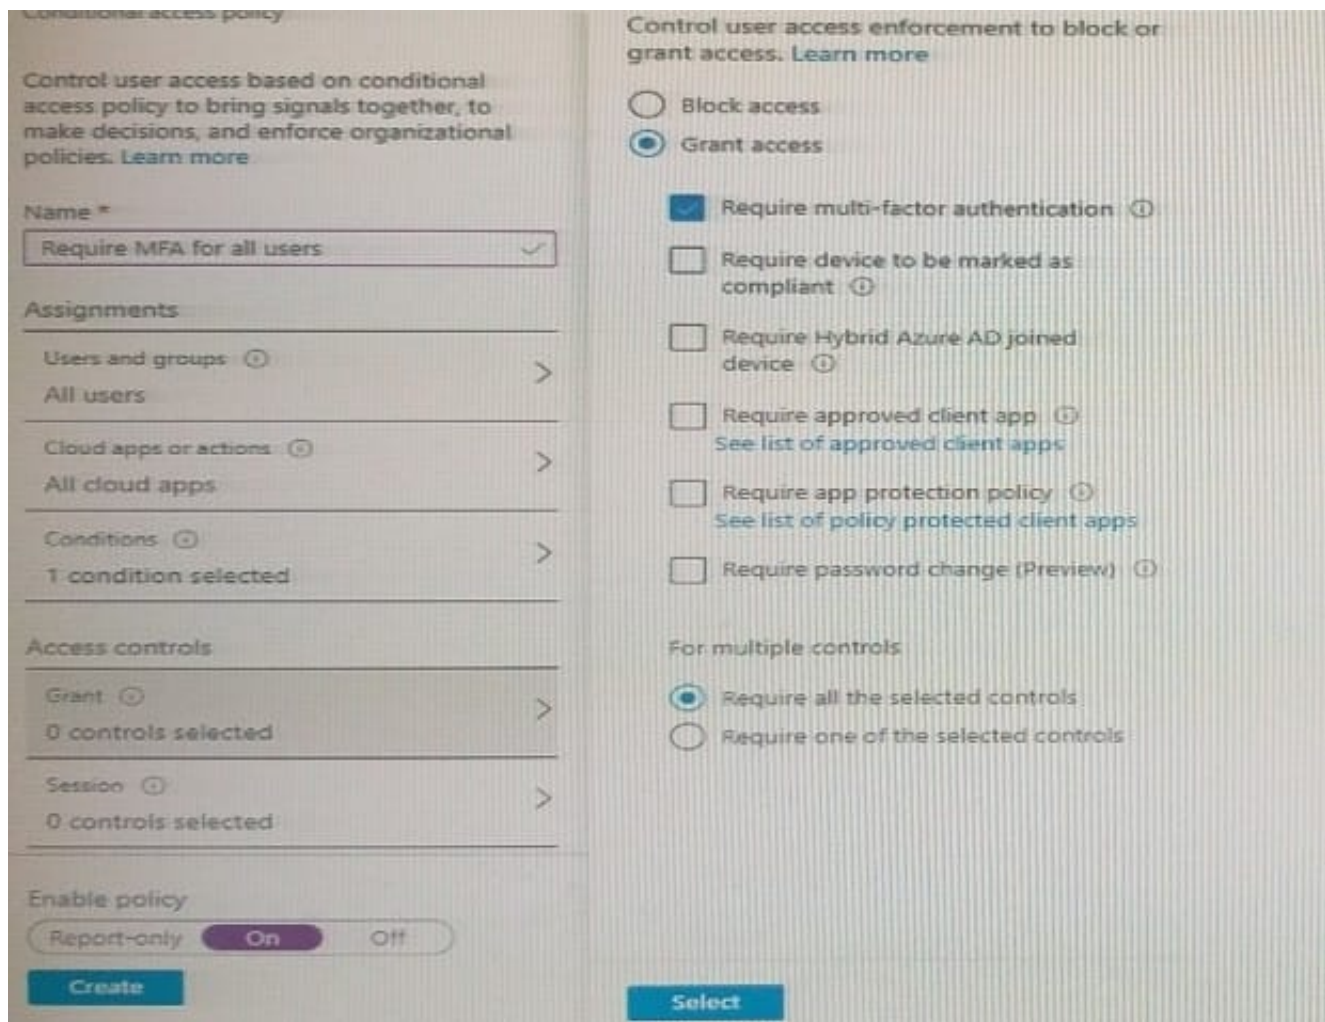

Correct Answer: B

QUESTION 7

HOTSPOT

You have a Microsoft 365 tenant.

You configure a conditional access policy as shown in the Conditional Access policy exhibit. (Click the Conditional Access policy tab.)

You view the User administrator role settings as shown in the Role setting details exhibit. (Click the Role setting details tab.)

Privileged Identity Management > ContosoAzureAD > User Administrator >

Role setting details - User Administrator

Privileged Identity Management | Azure AD roles

Edit

Activation

Setting	State
Activation maximum duration (hours)	8 hour(s)
Require justification on activation	Yes
Require ticket information on activation	No
On activation, require Azure MFA	Yes
Require approval to activate	Yes
Approvers	1 Member(s), 0 Group

Assignment

Setting	State
Allow permanent eligible assignment	No
Expire eligible assignments after	15 day(s)
Allow permanent active assignment	No
Expire active assignments after	1 month(s)
Require Azure Multi-Factor Authentication on active assignment	No
Require justification on active assignment	No

You view the User administrator role assignments as shown in the Role assignments exhibit. (Click the Role assignments tab.)

ContosoAzureAD > Identity Governance > Privileged Identity Management > ContosoAzureAD >

User Administrator | Assignments

Privileged Identity Management | Azure AD roles

+ Add assignments | Settings | Refresh | Export | Got feedback?

Eligible assignments | Active assignments | Expired assignments

Search by member name or principal name

Name	Principal name	Type	Scope	Membership
User Administrator				
Admin1	Admin1@m365x629615.onmicrosoft.com	User	Directory	Direct
Admin2	Admin2@m365x629615.onmicrosoft.com	User	Directory	Direct
Admin3	Admin3@m365x629615.onmicrosoft.com	User	Directory	Direct

For each of the following statement, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

	Yes	No
Before Admin1 can perform a task that requires the User administrator role, an approver must approve The activation request.	<input type="radio"/>	<input type="radio"/>
Admin2 can request activation of the User Administrator role for a period of two hours.	<input type="radio"/>	<input type="radio"/>
If Admin3 connects to the Azure Active Directory admin Center, and then activates the User administrator role, Admin3 will be prompted to authenticate by using Multi-factor authentication (MFA) twice.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

	Yes	No
Before Admin1 can perform a task that requires the User administrator role, an approver must approve The activation request.	<input checked="" type="radio"/>	<input type="radio"/>
Admin2 can request activation of the User Administrator role for a period of two hours.	<input checked="" type="radio"/>	<input type="radio"/>
If Admin3 connects to the Azure Active Directory admin Center, and then activates the User administrator role, Admin3 will be prompted to authenticate by using Multi-factor authentication (MFA) twice.	<input type="radio"/>	<input checked="" type="radio"/>

QUESTION 8

You have a Microsoft 365 tenant.

All users have mobile phones and Windows 10 laptops.

The users frequently work from remote locations that do not have Wi-Fi access or mobile phone connectivity.

While working from the remote locations, the users connect their laptops to a wired network that has internet access.

You plan to implement multi-factor authentication (MFA).

Which MFA authentication method can the users use from the remote location?

- A. an app password
- B. voice
- C. Windows Hello for Business
- D. security questions

Correct Answer: C

QUESTION 9

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Active Directory (Azure AD) tenant that syncs to an Active Directory forest.

You discover that when a user account is disabled in Active Directory, the disabled user can still authenticate to Azure AD for up to 30 minutes.

You need to ensure that when a user account is disabled in Active Directory, the user account is immediately prevented from authenticating to Azure AD.

Solution: You configure password writeback.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

Reference: <https://docs.microsoft.com/en-us/azure/active-directory/hybrid/choose-ad-authn>

QUESTION 10

You have an Azure Active Directory (Azure AD) tenant that contains cloud-based enterprise apps.

You need to group related apps into categories in the My Apps portal.

What should you create?

- A. tags
- B. collections
- C. naming policies
- D. dynamic groups

Correct Answer: B

Reference: <https://support.microsoft.com/en-us/account-billing/customize-app-collections-in-the-my-apps-portal-2dae6b8a-d8b0-4a16-9a5d-71ed4d6a6c1d>

QUESTION 11

You have a Microsoft 365 tenant.

You have an Active Directory domain that syncs to the Azure Active Directory (Azure AD) tenant.

Users connect to the internet by using a hardware firewall at your company. The users authenticate to the firewall by using their Active Directory credentials.

You plan to manage access to external applications by using Azure AD.

You need to use the firewall logs to create a list of unmanaged external applications and the users who access them.

What should you use to gather the information?

- A. Cloud App Discovery in Microsoft Defender for Cloud Apps
- B. enterprise applications in Azure AD
- C. access reviews in Azure AD
- D. Application Insights in Azure Monitor

Correct Answer: A

QUESTION 12

You have a Microsoft Exchange organization that uses an SMTP address space of contoso.com.

Several users use their contoso.com email address for self-service sign up to Azure Active Directory (Azure AD).

You gain global administrator privileges to the Azure AD tenant that contains the self-signed users.

You need to prevent the users from creating user accounts in the contoso.com Azure AD tenant for self-service sign-up to Microsoft 365 services.

Which PowerShell cmdlet should you run?

- A. Set-MsolCompanySettings
- B. Set-MsolDomainFederationSettings
- C. Update-MsolfederatedDomain
- D. Set-MsolDomain

Correct Answer: A

<https://docs.microsoft.com/en-us/azure/active-directory/enterprise-users/directory-self-service-signup>

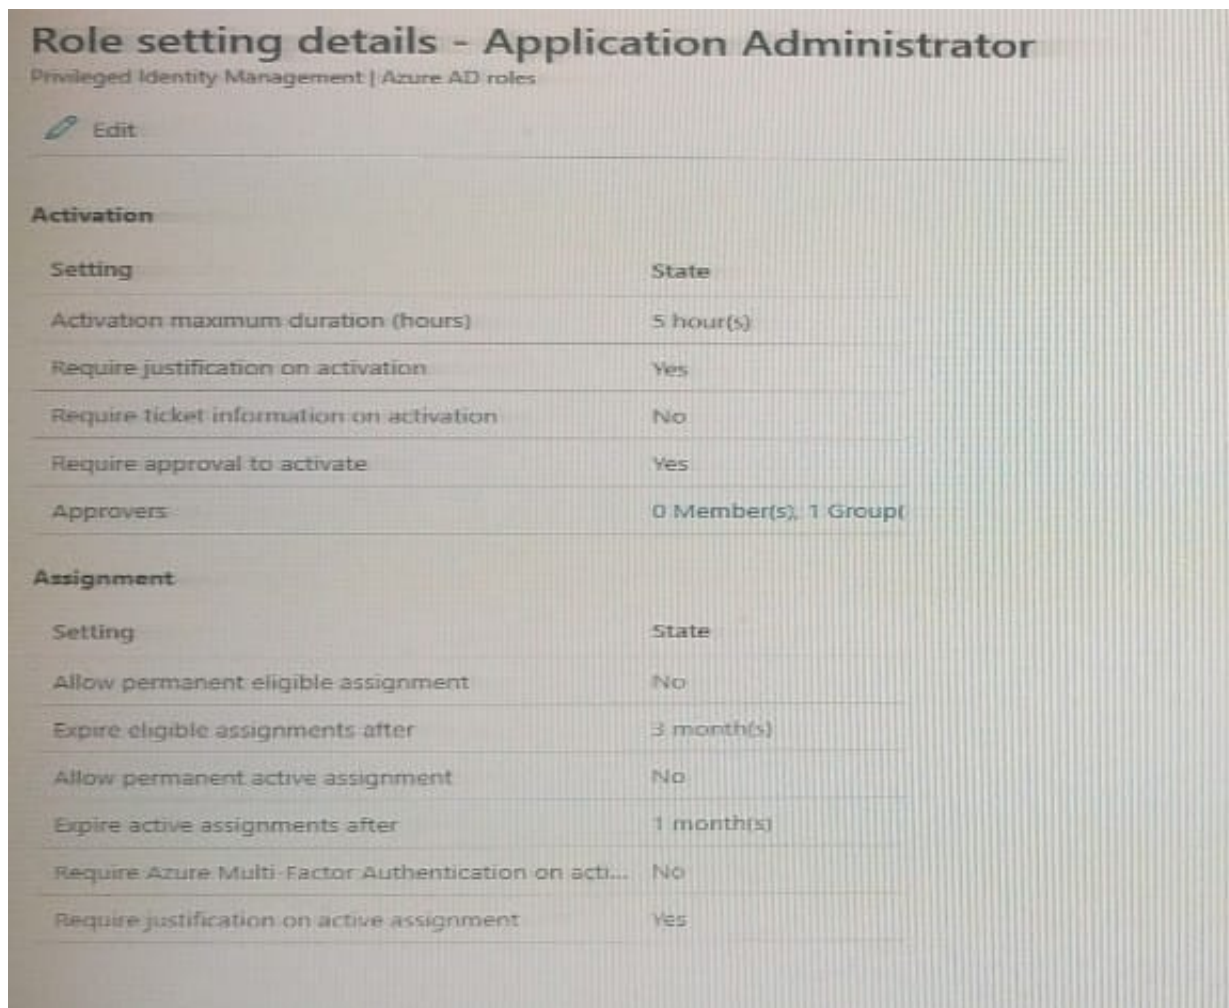

QUESTION 13

HOTSPOT

You have an Azure Active Directory (Azure AD) tenant that contains three users named User1, User1, and User3,

You create a group named Group1. You add User2 and User3 to Group1.

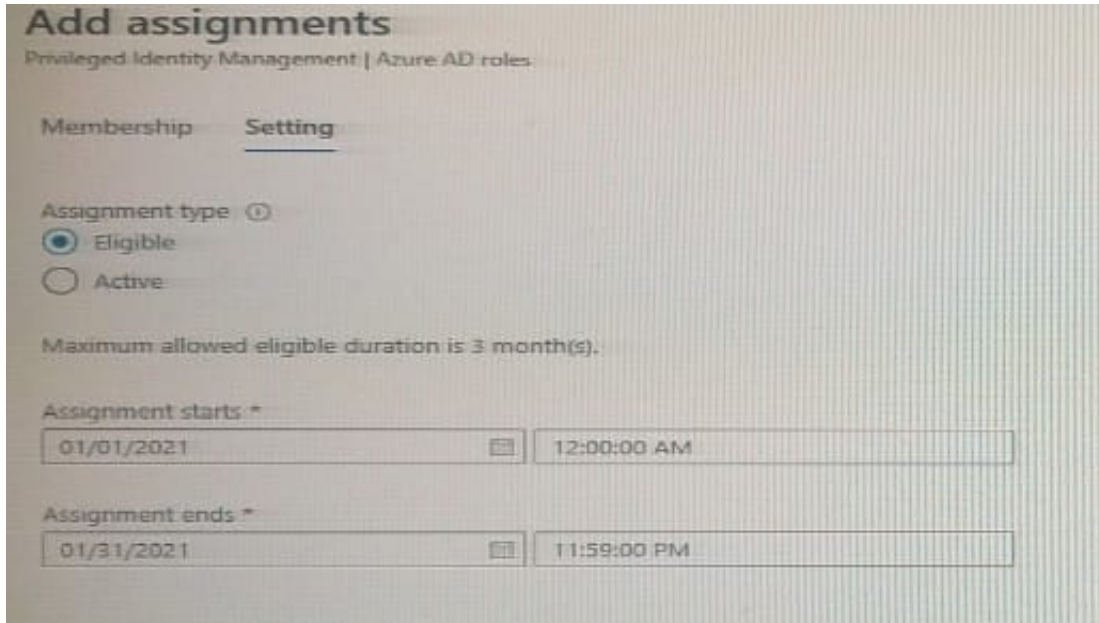

You configure a role in Azure AD Privileged identity Management (PIM) as shown in the application administrator exhibit. (Click the application Administrator tab.)

Group1 is configured as the approver for the application administrator role.

You configure User2to be eligible for the application administrator role.

For User1, you add an assignment to the Application administrator role as shown in the Assignment exhibit. (Click Assignment tab)

For each of the following statement, select Yes if the statement is true, Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

	Yes	No
User1 is assigned the Application administrator role Automatically.	<input type="radio"/>	<input type="radio"/>
When User2 requests to be assigned the Application Administrator role, only User3 can approve the request.	<input type="radio"/>	<input type="radio"/>
If a request by User1 to be assigned the Application Administrator role is approved on January 31,2021, at 23:00, User1 can use the role until February 1, 2021, At 04:00.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

- | | Yes | No |
|--|----------------------------------|----------------------------------|
| User1 is assigned the Application administrator role Automatically. | <input type="radio"/> | <input checked="" type="radio"/> |
| When User2 requests to be assigned the Application Administrator role, only User3 can approve the request. | <input checked="" type="radio"/> | <input type="radio"/> |
| If a request by User1 to be assigned the Application Administrator role is approved on January 31,2021, at 23:00, User1 can use the role until February 1, 2021, At 04:00. | <input checked="" type="radio"/> | <input type="radio"/> |

QUESTION 14

DRAG DROP

You have a Microsoft 365 E5 subscription that contains two users named User1 and User2.

You need to ensure that User1 can create access reviews for groups, and that User2 can review the history report for all the completed access reviews. The solution must use the principle of least privilege.

Which role should you assign to each user? To answer, drag the appropriate roles to the correct users. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content

NOTE: Each correct selection is worth one point.

Select and Place:

Roles

- Global administrator
- Global reader
- Reports reader
- Security operator
- Security reader
- User administrator

Answer Area

User1:

User2:

Correct Answer:

Roles

- Global administrator
- Global reader
- Reports reader
- Security operator
-
-

Answer Area

User1:

User2:

QUESTION 15

HOTSPOT

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the objects shown in the following table.

Name	Type	In organizational unit (OU)	Description
User1	User	OU1	User1 is a member of Group1.
User2	User	OU1	User2 is not a member of any groups.
Group1	Security group	OU2	User1 and Group2 are members of Group1.
Group2	Security group	OU1	Group2 is a member of Group1.

You install Azure AD Connect. You configure the Domain and OU filtering settings as shown in the Domain and OU Filtering exhibit. (Click the Domain and OU Filtering tab.) You configure the Filter users and devices settings as shown in the Filter Users and Devices exhibit. (Click the Filter Users and Devices tab.)

The screenshot shows the 'Domain and OU filtering' configuration window in Microsoft Azure Active Directory Connect. The window title is 'Microsoft Azure Active Directory Connect'. On the left, there is a navigation pane with the following items: Welcome, Tasks, Connected to Azure AD, Sync, Connect Directories, **Domain/OU Filtering** (selected), Filtering, Optional Features, and Configure. The main content area is titled 'Domain and OU filtering' and contains the following text: 'If you change the OU-filtering configuration for a given directory, the next sync cycle will automatically perform full import on the directory.' Below this text, there is a 'Directory:' dropdown menu set to 'contoso.com' and a 'Refresh Ou/Domain' button with a help icon. There are two radio button options: 'Sync all domains and OUs' (unselected) and 'Sync selected domains and OUs' (selected). Below these options is a tree view for the 'contoso.com' directory. The tree view shows the following items with checkboxes: BuiltIn, Computers, Domain Controllers, ForeignSecurityPrincipals, Infrastructure, LostAndFound, Managed Service Accounts, OU1, OU2, Program Data, System, and Users. At the bottom of the window, there are 'Previous' and 'Next' buttons.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Hot Area:

Statements	Yes	No
User1 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>
User2 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>
Group2 syncs to Azure AD.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Statements	Yes	No
User1 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
User2 syncs to Azure AD.	<input type="radio"/>	<input checked="" type="radio"/>
Group2 syncs to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
